
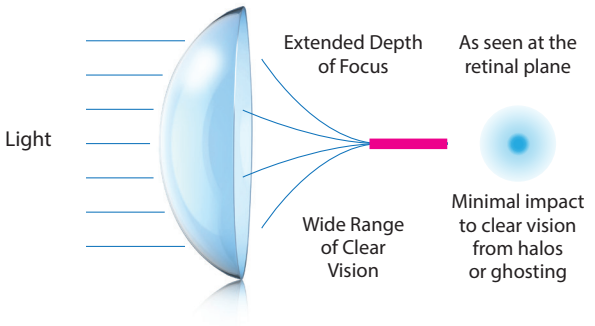
## Freedom to Live, Work and Play. Without Visual Compromise.

Presbyopes are busy — and they're not slowing down. They want vision that keeps up, without the hassle of reading glasses or lens changes as they age. NaturalVue® Enhanced Multifocal delivers seamless vision at every distance, plus continuous comfort in real-world conditions.

NaturalVue Enhanced Multifocal adapts to their pace, not the other way around. Let them live, work, and play without compromise, with the confidence that NaturalVue Enhanced Multifocal is right there with them.

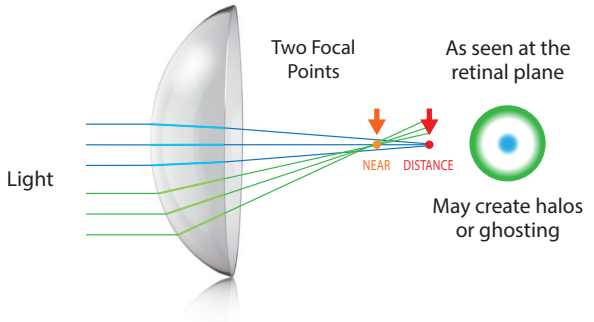
# One Lens for Early to Mature Presbyopes

## *Corrects Vision*



### NaturalVue Enhanced Lenses with Neurofocus Optics®

- Spectacle-level vision1 and 2x better stereoacuity* than leading lenses tested[2]
- Seamless near, intermediate, and distance vision, with less visual compromise[1]
- Preserves distance vision and provides functional vision as close as 13"[1]
- **Wide parameter range, +4.00 D to -12.25 D**
- **Proven to correct astigmatism up to 3.00 D[3]**



### Traditional Multifocal Lenses

- Traditional multifocal designs with two focal points may cause wearers to experience compromised vision such as: diminished near or distance vision; ghosting and/or halos[4]

***Download the Defocus Curve Peer-Reviewed Paper***

## *Continuous Performance Over Time*

- Maintains visual acuity without compromise[1] across various lighting
- Supports active lifestyles without glasses[5]
- Features TripleTear® lubrication system, including 3 comfort enhancers for all day wear[6], especially helpful for mature presbyopes

## *Visual Independence*

**1**

### *Universal ADD*

A recent study also confirmed that NaturalVue's Enhanced Universal ADD **means no need for separate low, medium and high ADDs that often require extensive refits as the patient ages[1]**

**92%** of daily activities can be completed without reading glasses[5]
